

Team Rules & Coding Standards

Team Runtime Error

Amin Parvizi (SM), Behrad Rezazadeh Moussavi, Huyang Yu, Nicholas Lozano (PO)

Team Rules

1. Friday @ 5:00pm weekly team meetings.
2. During the meet each member will present what they have done in the past week and discussion with the group how to improve better.
3. Assigned work is distributed equally among team members.
4. Assigned work is completed on the due dates.
5. Ask for help if you think you need help.
6. Be nice and treat others how you would like to be treated.

Coding Standards

1. Comments for classes and functions should be made with Doxygen standards in mind.
2. Code Language: C++.
3. UI: Qt Creator, SQLite
4. The defined user stories give the summary of what each story or file does.
5. Describe every part of the program and the function should be successful and short.
6. Readable coding and proper spacing.
7. All files, functions, and variables should be defined and named.
8. Enough space should be left in the code.
9. Variable, method, and class names should be logical and related to their function.
10. Above each file, there should be a header commented out that explains what the file does and its relation to the overall program.
